Lawn Grass Seed

The Botanical Encyclopedia lists one hundred and eleven varieties of grasses. More than a hundred of these are unfit for lawn-making. Of the remaining sorts no single kind will make a perfect lawn; and the combination of sorts that will make a successful lawn in one locality might prove a complete failure elsewhere.

STITT LAWN GRASS MIXTURE contains a well balanced blend of grasses that will produce the best results under the varied soil conditions found hereabouts. This mixture will give a smooth, velvety sod with a thick bottom, and is free from such varieties as produce clumps. 1 lb. 60c; 3 lbs. \$1.70; 5 lbs. \$2.75; 10 lbs. \$5.25; 20 lbs. \$10.00; 100 lbs. \$47.50.

STITT SPECIAL LAWN GRASS MIXTURE FOR SHADY PLACES equal in quality to our regular mixture but containing more of the deep rooted varieties so essential for heavily shaded locations. 1 lb. 70c; 3 lbs. \$2.00; 5 lbs. \$3.25; 10 lbs. \$6.25; 20 lbs. \$12.00; 100 lbs. \$57.50.

STITT CREEPING BENT LAWN MIXTURE. The popularity of Creeping Bent Grass on golf courses has created a persistent demand for a good Creeping Bent Mixture for lawn making. After a careful study of the advantages of such a mixture we have developed one composed of four fine grasses of the highest quality and this we submit for your approval with our heartiest recommendation.

The Stitt Creeping Bent Mixture will produce a thick turf of velvety appearance, great resilience and extreme durability; and will withstand an amount of hard wear that would ruin lawns of ordinary kinds.

It is especially suggested for use where the lawn is to be the outdoor living room or play spot. 1 lb. \$1.00; 3 lbs. \$2.90; 5 lbs. \$4.75; 10 lbs. \$9.25; 20 lbs. \$18.00.

Use one pound of above sorts to 400 square feet for new lawn.

STITT "DO-WELL" LAWN GRASS SEED. This is mixed with just as great care as our higher priced mixtures but contains Canadian Blue Grass instead of Kentucky Blue Grass, and a greater quantity of Timothy than does our other mixtures; it will give a quicker growth, but has not quite the same amount of perennial grasses as our better grades.

Use 1 lb. for 300 sq. ft. of new lawn, or 1 lb. for 400 sq. ft. of renovated lawn.

1 lb. 50c; 3 lbs. \$1.45; 5 lbs. \$2.25; 10 lbs. \$4.25; 20 lbs. \$8.00; 100 lbs. \$37.50.

THE STITT MIXTURE FOR GOLF COURSES AND ATHLETIC FIELDS, in correct combinations for all soils.

Only the very finest grades of seeds should be used in these mixtures. The grasses must form a densely matted turf that will afford a firm but resilient foothold, and be of such varieties as will withstand frequent close cuttings.

The Stitt Golf Link Mixtures will meet these requirements, but if any special conditions of soil or location are to be met, advise us of your needs; the kind of soil to be covered, and the general lay of your land. We will gladly recommend the mixture best suited to the situation.

SUGGESTIONS FOR ORDERING

To secure the promptest attention, orders from new customers should be accompanied by remittance covering the full amount of the purchase or by satisfactory business references. Remittances may be made by Check, Draft, Express or Postal Money Order or by Registered Letter. Postage stamps may be sent for sums less than One Dollar.

On account of their perishable nature we cannot reserve Trees, Plants, Roots or Bulbs nor order special varieties of these for customers whose names are not on our books, unless twenty-five per cent of the purchase price is paid when the order is placed; neither can we accept orders for these to be shipped C. O. D. except on the same terms.

When ordering, write plainly YOUR NAME—STREET OR ROUTE NUMBER—POST OFFICE—COUNTY AND STATE. Delays in receipt of goods will be avoided by careful attention to these details.

Except where otherwise specified any purchase of Flower, Vegetable or Lawn Seeds, Roots or Bulbs amounting to \$2.00 or more, will be delivered free of charge to any address within the first three postal zones from Cleveland. On amounts of less than \$2.00 add 10 per cent for postage.

On account of their perishable nature, Plants, Shrubs and Trees should be sent by Express.

DISCLAIMER

In the selection of stock and the testing of seeds we take all possible precautions to insure success for the planters, but we wish it distinctly understood that because circumstances may arise over which we have absolutely no control, we find it necessary as is customary in the Seed Trade to give no Warranty, express or implied, as to description, quality, productiveness, or any other matter of any Seeds, Plants, or Bulbs we send out, and we will not be responsible in any way, for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

VEGETABLE SEEDS

ARTICHOKES

The seed we offer is that of the true artichoke which is an extensively used vegetable in Europe. In it the edible portion is the thickened scales at the base of the buds.

French Globe. The standard and best variety for sowing. Pkt. 25c; oz. \$1.10; $\frac{1}{4}$ lb. \$3.25. One ounce will produce about 200 plants.

Jerusalem Artichokes. Tuberos roots used extensively for stock feeding. 1 lb. 25c.

ASPARAGUS

You can have an abundance of fresh Asparagus from your home garden, even though you have but a small space.

Barr's Mammoth. Very large, tender stalks, light green.

Conover's Colossal. One of the largest and most extensively used green sorts, best quality.

Palmetto. Early maturing and prolific, very desirable. All varieties, pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 45c; lb. \$1.45.

ASPARAGUS ROOTS

Washington. This we believe to be the best all-around sort for the home garden. Two year. Per 100 \$2.50; per 1000 \$15.00.

BEANS—Dwarf or Bush. Beans are tender and should not be planted until danger of frost is over. Then they can be planted in succession until August. Limas are especially tender and usually are the last to be planted.

Dwarf beans are as a rule hardier and earlier than the climbing sorts. One pound will plant 50 feet of drill. 60 lbs. equal one bushel.

Dwarf Green Podded.

Burpee's Stringless Green Pod. The earliest in our list and enormously productive. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 80c; 5 lbs. \$1.90; 10 lbs. \$3.50.

Full Measure. An excellent green-podded bush bean, producing round pods entirely free from strings. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 80c; 5 lbs. \$1.90; 10 lbs. \$3.50.

Refugee. A remarkably prolific, round podded sort much in demand for late planting. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 85c; 5 lbs. \$2.00; 10 lbs. \$3.75.

Extra Early Red Valentine. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 85c; 5 lbs. \$2.00; 10 lbs. \$3.75.

Early Bountiful. Very hardy. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 85; 5 lbs. \$2.00; 10 lbs. \$3.75.

BEANS—Dwarf Wax.

Improved Golden Wax. One of the best oval wax sorts. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 80c; 5 lbs. \$1.90; 10 lbs. \$3.50.

Wardwell's Kidney Wax. The most popular variety in this locality. Pkt. 10c; $\frac{1}{2}$ lbs. 25c; lb. 45c; 2 lbs. 85c; 5 lbs. \$2.00; 10 lbs. \$3.75.

BEANS—Continued.

Sure Crop Stringless—Black Wax. An early yellow podded variety. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 80c; 5 lbs. \$1.90; 10 lbs. \$3.50.

Stitt Round Pod Black Wax Bean. Golden yellow; black seeded pod; stringless, brittle and of finest flavor. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 80c; 5 lbs. \$1.90; 10 lbs. \$3.50.

Pencil Podded Black Wax. Flesh brittle and stringless. Fine, mild flavor. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 80c; 5 lbs. \$1.90; 10 lbs. \$3.50.

BEANS—Field or Shell.

Large White Cranberry or Marrow Bean. Used as an early shell bean. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 80c; 5 lbs. \$1.90; 10 lbs. \$3.50.

Long White Kidney. Early, rich flavor. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 85c; 5 lbs. \$2.00; 10 lbs. \$3.25.

White Pea or Navy. The most popular baking bean. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 40c; 2 lbs. 75c; 5 lbs. \$1.75; 10 lbs. \$3.25.

BEANS—Pole or Running

Pole or "corn" beans should be planted only when danger of frost is over.

Kentucky Wonder. (Old Homestead). One of the very best green-podded beans. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 80c; 5 lbs. \$1.90; 10 lbs. \$3.50.

Kentucky Wonder Wax. This yellow podded sort is of similar habit to the above. Pkt. 10c; $\frac{1}{2}$ lb. 30c; lb. 55c; 2 lbs. \$1.00; 5 lbs. \$2.40; 10 lbs. \$4.50.

Lazy Wife. A favorite sort for a late green pole bean. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 85c; 5 lbs. \$2.00; 10 lbs. \$3.75.

Long Dutch Caseknife. Long pod with beans of moderate size. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 50c; 2 lbs. 90c; 5 lbs. \$2.15; 10 lbs. \$4.00.

Horticultural or Speckled Cranberry. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 80c; 5 lbs. \$1.90; 10 lbs. \$3.50.

Scarlet Runner. Flowers bright scarlet, pods green. Pkt. 10c; $\frac{1}{2}$ lb. 30c; lb. 55c; 2 lbs. \$1.00; 5 lbs. \$2.40; 10 lbs. \$4.50.

BEANS—BUSH—Lima

Limas must only be planted when danger of frost is over and the soil is warm and dry. The dwarf varieties cannot be recommended too highly; they are fully equal to the pole kinds in quality and usually are earlier to mature.

Henderson's Bush Lima. An excellent bush form. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 50c; 2 lbs. 90c; 5 lbs. \$2.15; 10 lbs. \$4.00.

Fordhook Bush. Large thick beans of the best quality. Pkt. 15c; $\frac{1}{2}$ lb. 30c; lb. 50c; 2 lbs. 90c; 5 lbs. \$2.15; 10 lbs. \$4.00;

Burpee's Improved Bush Lima. Pkt. 15c; $\frac{1}{2}$ lb. 30c; lb. 50c; 2 lbs. 90c; 5 lbs. \$2.15; 10 lbs. \$4.00.

BEANS—Pole Lima

Early Leviathan. Extremely productive; Pkt. 10c; $\frac{1}{2}$ lb. 30c; lb. 50c; 2 lbs. 90c; 5 lbs. \$2.15; 10 lbs. \$4.00.

King of the Garden. Uniformly large beans of excellent quality. Pkt. 10c; $\frac{1}{2}$ lb. 30c; lb. 50c; 2 lbs. 90c; 5 lbs. \$2.15; 10 lbs. \$4.00.

BEETS

Sow in drills twelve to fifteen inches apart, and about one inch deep, pressing the earth firmly upon the seed—a very important matter. Thin out when the plants are large enough. One ounce will sow 50 feet of drill.

Crosby's Early Egyptian. Extra early, dark red; Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.35.

SERVICE

WE OFFER GRATIS, TO OUR CUSTOMERS, a service that few houses in our line are equipped to offer, even at a price.

In our employ are trained, practical Gardeners whose advice and assistance are at the service of our patrons. To the garden lover who wishes to get the best of decorative effects with plants and shrubbery or who wishes the utmost yield of Flowers, Fruits or Vegetables from his piece of ground, whether it be a city lot or a suburban estate, we will gladly submit without charge, our suggestions for the most practical way of accomplishing either.

Tell us the dimensions of the lot and of the buildings, with their relation to the points of the compass, the character of the soil and the name of any favorite plants that may be especially wanted. We will then draw up a plan and submit a list of the necessary plants, with the location of each clearly indicated: or if preferred, one of our men will call and make his recommendations in person.

The plan that we will submit will be so clearly laid out that it may be followed by any one engaged to do the work: but if the planting is to be done by an inexperienced person or by an amateur, we will even supervise this part of the work and instruct the person in the simplest and most practical method of doing it.

For the plans and suggestions we make no charge. The seeds and plants required will be charged for at our regular catalog prices.

CULTURE and CARE OF FLOWERS

In Our List of Flower Seeds will be found all those varieties known to be *desirable* and *worthy* the attention of florists and amateurs. Our Catalogue is arranged with a view to aid our patrons in their selection by offering the *very best* varieties of each species.

Success. With patience and the exercise of reasonable judgment, anyone may soon acquire experience enough to successfully grow most of the species of flowers; failure more often results from ignorance and neglect than from any fault of the seeds or of nature. *Constant Care is Required* in any event.

Reliable Seed is the first requisite. We spare no pains or expense to procure the *Very Best*. A thorough trial of our seeds will do more to establish this fact in the minds of our patrons than any statement made by us would be likely to do.

When and How to Sow. The first of May is early enough, in this latitude, to sow most of the species in the open ground; too early sowing is a great mistake. The small and delicate seeds must be covered *Very Lightly* with earth; the finest of them had better be sown *Without Any Covering*, the simple pressure of a smooth board being sufficient. Repeated experiments with various kinds of delicate seeds, induces us to advise, in addition, the covering of such seeds with sheets of newspaper until they are through the ground, thereby preventing the surface evaporation, which so often causes failure, besides protecting the seeds from being forced into the ground so deeply through careless watering, that they could not sprout. By following this method many seeds that are rather difficult to start may be quite successfully grown. The larger and more hardy seeds may be planted deeper and some of them earlier. It is a safe rule to sow most seeds to a depth of *Four or Five Times* the *Diameter* of the seeds itself.

Location. A rather light sandy loam suits most flowers, and, in such soils, seeds generally germinate well. Some flowers thrive best in a rather shady situation and in rather heavy clay soils (the Pansy is a notable instance), while others do best upon light, poor soils exposed to the full rays of the sun; this is particularly true of the Portulaca.

Early Sowing. The seeds of nearly all the annual varieties and many of the biennials and perennials, may be sown in March or April, under glass frames, in greenhouses, or in small boxes in any sunny window. In this way a good stock of plants may be had at small expense, and a gain of several weeks made in the season of blooming; and when the plants are set out of doors further transplanting is not required. Shallow boxes, two or three inches deep, and with open seams at the bottom are the best in which to start the seeds. Fill these boxes to within half an inch of the top with good rich soil, mixed with about one-fourth sand. Make the surface level and smooth and upon this scatter the seeds sparingly. Use a fine sieve, with which sift carefully over the seeds just enough earth to cover them. Afterwards gently shower them with tepid water, using a fine sprinkler, and keep the boxes in a temperature as near 60 degrees as possible. Avoid much watering unless the surface of the soil appears dry. Transplant into other boxes when the plants are

CULTURE AND CARE—Continued.

large enough to handle, setting them from half an inch to an inch apart. In setting plants out into the beds or borders, allow a liberal space for each.

Late Sowing. Most of the biennials and perennials may be sown late in the summer, from the middle of August through September, and they will then bloom the following season. When cold weather sets in about the only protection necessary for the young plants is a covering of leaves, straw or litter to a depth of three or four inches, and a board on top to keep it in place. They should be uncovered soon after the middle of March.

COMMERCIAL FERTILIZERS. *From an experience of many years* we confidently recommend for general use commercial fertilizers for all plants; it is more permanent than stable manure, and has the additional advantage of never introducing seeds or weeds.

Annuals, Biennials, Perennials. Flowers are classified as Annuals, Biennials and Perennials. Annuals, are those plants that bloom the first year from seed and after ripening their seeds, perish the same season. They comprise many of the most beautiful flowers, and, as a rule, are of easy culture. Some of the Biennials and Perennials will flower the first season if the seed is sown early, and they may then be kept over for another year or longer. Pansy, Snapdragon, Pinks, etc., belong to this class. Biennials bloom the second year from planting the seed, and then die. Perennials, as a rule, bloom the second year, and are more or less permanent thereafter. The seeds of some of the Perennials remain a long time in the soil before germinating.

DAHLIAS

Chief among the newer of these is the Cactus type with long curled and twisted petals, which is a radical departure from the old-fashioned "Show" Dahlia with each petal set in its place. Then there are Decorative and Fancy Dahlias with reflex petals. Pompon Dahlias, which have small ball-shaped flowers, Single Dahlias in many beautiful colors and the tall-growing, loose-petaled type with its big fluffy blooms. We submit below a list of the very finest Dahlias that are now cultivated. These are so widely different from the common garden Dahlias of a few years ago that they will scarcely be recognized as belonging to the same group of flowers.

HARDY ROSES

Roses should be planted in rich, well prepared soil, preferably clay loam, fertilized with well rotted manure or bone meal. They should be given thorough, but shallow cultivation. The best results can be obtained when planted in the open sunlight. All Roses are benefitted by winter protection, by banking about the plant with earth or covering with a light mulch of leaves or straw. Roses should be trimmed in the spring before growth starts, shaping the plant and removing all canes that have become weakened by blooming.

HARDY ROSES—Continued

The health and vigor of the plant can be improved by removing the dead flowers during the summer.

To counteract any damage to the leaves by worms use Arsenate of Lead; for aphid, thrip, or red spider, use Nicotine; and for fungus use Bordeaux Mixture.

SPRINGFIELD ROSE FOOD. Will keep your bushes in splendid condition and produce an abundant crop of perfect blooms. 10 lbs. \$1.00.

ADCO ARTIFICIAL STABLE MANURE

England, the country of beautiful gardens, has discovered a way to make manure without dependence upon stables. The process consists of making a heap of all garden trash as it is collected, wetting it thoroughly, and adding to it a bacterial food—known as ADCO. In the course of three or four months the heap is converted by the action of the growing bacteria into a pile of excellent manure.

INSECTICIDES—Continued

Insecticides and Spraying Compounds

Ansect (Rose Bug Destroyer). Although designed primarily for the Rose Bug, ANSECT will be found very effective against Red Spider, Aster Beetle, Leaf Hopper, Mealy Bug, most Aphids (Plant Lice) and other garden pests. The same dilution may be used on all with good results. Pints, \$1.00; Quarts \$1.75; 4 oz. Sample Can, 30c.

Arsenate of Lead. Powder. The best remedy against canker worm, curculio and all leaf-eating insects on any plant, tree or shrub. A pure article that will not burn the foliage. Ours is the purest to be had. It sticks to the foliage. Use as directed on the package. ½ lb. 30c; lb. 45c; 4 lbs. \$1.50; per 100 lbs. \$31.00.

Cyonagas "A" Dust. For the control of Rodent and Insect Pests. Will destroy rats, mice, moles, ground hogs, garden ants, etc. Dust a small quantity in run-or burrows; the gas released by exposure to the air will destroy the vermin. 1 lb. can 75c; Combination of One Pound Can and Special Duster Gun \$2.00.

Bordeaux Mixture. This is recommended for the control of fungus diseases or blight, rot, leaf-curl or whatever name is used to designate the condition into which various plants and trees get when infested. Ours is powdered, one pound of which will make five gallons ready to apply. It is advantageous to add one quart of molasses or a pound of glucose to a barrel to make it stick better. Per ½ lb. 25c; per lb. 40c; 4 lbs. \$1.35; 100 lbs. \$22.50.

INSECTICIDES—Continued.

Hammond's Slug Shot. Recommended for most worms and caterpillars which infest cabbage plants, currants, gooseberries and the like. 1 lb. Sifter Carton, 20c; 5 lbs. 60c.

Scalecide. This is a miscible oil effective against scale on fruit and shade trees. It is used the same as the Lime and Sulphur Wash, opinions differing as to which is the best to use when considering the effects on the trees. Use 15 gallons of soft water to one of Scalecide. Price, Quart 75c; \$1.75 per gallon; 5 gallons for \$6.50; 10 gallons for \$11.00; 50 gallon barrel \$39.50.

Sulphur—Flowers of. Very finely pulverized for arresting mildew. Pkt. $\frac{1}{2}$ lb. 15c; lb. 25c.

Tobacco Dust. Fertilizer and insecticide. An excellent fertilizer for lawns and gardens, and a good preventive against cut worms and leaf eating caterpillars. Dust onto the plants when they are wet, and for cut worms spread on the ground around the plants to be protected. If you have been troubled with wormy radishes or sickly lettuce, use a tablespoonful to the foot in the bottom of the furrow and sow the seeds right in the Tobacco Dust. It is a sure cure and will give you perfect radishes and lettuce. Per lb. 15c; 5 lbs. 50c; 10 lbs. 90c; 25 lbs. \$2.00.

Tree Tanglefoot. Similar to that used in making fly-paper. It is easily applied and is a most effective and economical protection for Fruit, Shade and Ornamental Trees against all crawling insects such as Canker Worms, Climbing Cut Worms, Ants; and the caterpillars of the Gypsy, Brown Tail and Tussock Moths.

Prices, 1 lb. Can 60c; 5-lb. Can \$2.75; 10-lb. Can \$5.25; 25 lb. Pail \$11.00.

GARDEN IMPLEMENTS

In our stock of garden implements we shall carry only those qualities that we feel assured will render continuous and satisfactory service to the purchaser. The buying of garden tools with price as the only consideration is questionable economy.

ASPARAGUS KNIFE

Short handle, long steel blade. Each 50c; also useful as a dandelion weeder.

The "Diamond E" Porcupine Cultivator
A steel roller $7\frac{1}{2}$ inches wide, studded with rows of steel spikes which enter the soil vertically to a depth of about two inches. As the roller revolves the spikes come up horizontally, bringing a section of the earth crust up against the stationary stripper

fingers, crushing and finely pulverizing it. A handy tool for preparing seed-beds; and for working in top-dressing. Very light running and easy to handle.

Price, \$4.50.

PETS AND SUPPLIES

OUR BIRDS

Our birds are all imported from the best bird-breeding countries of the old world; and are tested for song before leaving the homes of their breeders; the next test is made immediately upon their arrival in this country; then our own representative inspects and tests them at the port of arrival, selecting for shipment only those having the clearest notes. When they arrive at our store they are again tested and classified according to the purity of their note-tones and the quality and length of their songs. At this final testing the price of each individual bird is decided upon. This price

is governed by the bird's qualifications as a singer. It is because of these numerous tests that we are enabled to guarantee every bird that we sell. Most of the best canaries reaching this country come from the Hartz Mountain districts of Germany and the Norwich and Yorkshire districts of England; and all of the best types are represented in our stock.

The prices of the birds vary from season to season; but tested singers having the best physical traits are usually priced at from \$8.00 to \$12.00, while some having songs of unusual quality will be priced higher; others, whose songs have not fully developed, and yet may eventually prove to be splendid singers are priced below the minimum quoted above.

BIRD SUPPLIES

The Bird Foods and Remedies offered in the following pages have been made and sold by this company for over fifty years. Competing preparations by the dozens have come and gone during this time, while the sale of our preparations increases each year. Our foods and remedies could not have survived this competition unless they possessed the unusual merit that we claim for them.

Our large stocks of valuable birds are nourished and conditioned with exactly the same preparations that we offer for sale.

WILSON'S MIXTURE OF CANARY AND RAPE SEED

is now, as it has been for over fifty years, a blend of the finest and cleanest Canary and Rape Seed that it is possible to purchase. Food for human epicures is not selected with more care than we give to the selection and mixing of these seeds; and it is a peculiar fact that more than a quarter of a century before an enterprising baking company began to pack food for human consumption in sealed packages, this company was sealing bird-seed in cardboard containers so it would reach the customer as fresh and clean as when mixed.

If your bird refuses the seed you now get for him or if it fails to nourish him sufficiently try this mixture of ours. Put up in pound cartons and priced at 20c. By mail, postpaid, 25c.

WILSON'S SONG RESTORER AND CANARY BIRD FOOD

When birds are sick or out of song this will restore both health and melody. Birds in perfect health may have their song improved by regular feedings of this, as directed on the container.

Price 20c—By Mail, Postpaid, 25c.

WILSON'S MOCKING BIRD FOOD

The ingredients of this food are selected and mixed, with the object of duplicating as nearly as possible the diet of the birds living in their natural state. It contains vegetable, animal and insect components; and its use will keep the birds in the best of physical condition and consequently in good song.

BIRD SUPPLIES—Continued.

This food will be relished by Mocking Birds, Thrushes, Troopials, and all soft-billed birds.

The price is 50c per can. By mail, 60c.

WILSON'S PARROT SEED

contains a mixture of the seeds best suited to the nourishment and sustenance of the parrot. This mixture contains many food elements not supplied by the sunflower seed alone. It is thoroughly re-cleaned, well cured and packed in sealed cartons so it reaches the customer fresh and clean.

Carton containing 1½ lbs., 30c. By mail, 8c extra.

WILSON'S CHOICE SUNFLOWER SEED

This seed is selected expressly for Parrot Food and consists entirely of clean, plump, meaty kernels: it makes a nourishing ration for the birds; and next to Wilson's MIXED Parrot Seed is the best seed to feed him.

Per lb., 20c. By mail, 25c.

Write for special prices in bulk.

WILSON'S BIRD TONIC

A certain cure for loss of song, weakness when moulting, colds, asthma or hard breathing, shedding feathers out of season and all other diseases of cage birds.

Price 25c—By Mail, Postpaid, 25c.

WILSON'S PARROT TONIC

A cure for colds, lack of condition, over-feeding, plucking feathers, etc.

Price, 40c. By mail, Postpaid, 45c.

WILSON'S PURE INSECT POWDER**For Use on Birds**

Made from fully developed Pyrethrum flowers; bolted to extreme fineness to insure penetration to the roots of the feathers. Non-poisonous to Birds or Animals but sure death to insects.

In 1 oz. bottles, 20c. In Blow Guns, 30c. Either by mail, 5c extra.

WILSON'S SILVER LAKE SAND

is necessary to the welfare of the cage-bird, which having no teeth for chewing its food must depend upon grit taken into the crop to masticate and prepare the food for the digestive processes. The sand is priced at 10c per box of 2 lbs. By mail, Postpaid, 18c.

WILSON'S GRAVEL PAPER

Made for round, square and oblong cages is in many instances preferable to the loose sand as it reduces the work of cleaning the cage and eliminates the scattering of sand outside the cage. We manufacture this gravel paper by hand, using only pure wheat flour adhesives and clean gravel so no injurious substances can enter into its composition.

Square or Oblong Sheets—20c per dozen.

Round—25c per dozen.

Round—extra large, 11 inch diameter. 30c per dozen.

By mail, 5c per dozen extra.

Sizes—6¾x8¾—7¼x9¼—7¾x10¾
